Schedule of Exports - 1952

In the following schedule the export quotas which were determined in Berlin on 13 March 1952 are listed according to camera model and equipment and arranged by quarters. Only slight changes were necessary to coordinate them with the individual firms. This schedule can be used as a basis for determining the conclusion of contracts between the DIA and the firms. Optical and shutter equipment can be changed to meet the special requirements of foreign customers. Such changes would then be accounted for by supplements to the existing contracts.

Camera Type and Equipment	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
------------------------------	------------------	-------------------	------------------	-------------------	-------

Beltica - 13,000 units

Meritar 2.9 Cludor	1,000	1,000	1,000	1,000	4,000

Pololux 3.5 flashlight	300	1,500	900	900	3,600
	600	3,000	1,800	1,800	7,200

Praktika - 16,000 units

As a result of production difficulties caused by insurmountable material shortages, the KWN plant at the present time is negotiating to have its production quota lowered from 26,720 to 23,000 units. If this proposed reduced production quota is acceptable, the quarterly quotas will automatically be lowered proportionately.
